

Environmental Indicator Management

Our ENVIRX management solution enables organisations to manage their risk-based material environmental impacts in an integrated manner. It uses the same dynamic framework to measure, trend and report on organisational impact, e.g., materials, water, energy, biodiversity, effluents and emissions among others.

Why our ENVIRX Solution is good for business

- Reduction in audit costs
- Leadership management of the effectiveness of ENV strategy and adherence to top management environmental risk appetite
- Reduced sustainability and integrated reporting cycle time and associated costs
- Visibility of organisation compliance areas and performance
- Visibility of carbon, water and waste footprint and performance of improvement and efficiency initiatives
- Increased business ability for environmental legislation and regulations compliance
- Proactive management of environmental risks and opportunities

Driving compliance, sustainability and performance with our popular ENVIRX Modules:
