

ENVIRX®

Environmental compliance you can demonstrate, not just claim.

ENVIRX® captures, tracks, and reports environmental performance data — from waste and water to air quality and energy consumption — in a single auditable system aligned to ISO 14001 and local environmental legislation.

WHAT ENVIRX® DELIVERS

Environmental Monitoring

- Environmental Monitoring
- Air Quality Monitoring
- Noise Monitoring
- Water Quality Monitoring

Compliance & Legal

- Legal Compliance
- Objectives & Targets
- Strategy & Initiatives
- Document Manager

Operations & Governance

- Governance
- Leadership
- Planning
- Support

Performance & Improvement

- Performance Evaluation
- Improvement
- Risk Assessment
- Event Management

THE CHALLENGES IT FIXES

Monitoring data scattered across sites

Each facility tracks environmental data differently. Consolidated reporting requires weeks of manual reconciliation.

Regulatory inspections reveal unrecorded incidents

Environmental events that were informally dealt with on-site become formal non-compliances when an inspector asks for the evidence.

Targets set but not monitored

Reduction commitments made to stakeholders and regulators. Progress is invisible until the annual sustainability report.

Legal requirements change faster than compliance registers

Environmental legislation is updated continuously. Manual tracking cannot keep pace.

PART OF THE XGRC® PLATFORM

ENVIRX® runs on one secure, auditable data foundation with risk, compliance and assurance, so it is governed as part of the whole, not in a silo.
