

Enterprise Risk Management

Risk managed at enterprise scale, not spreadsheet scale.

A structured, auditable approach to enterprise, operational, and project risk — aligned to ISO 31000 and COSO ERM — with board-level dashboards, risk appetite monitoring, and corrective action tracking built in.

WHAT ENTERPRISE RISK MANAGEMENT DELIVERS

Risk Identification

- Risk Register
- Risk Categorisation
- Emerging Risk Tracking
- Risk Event Capture

Assessment & Appetite

- Likelihood & Impact Scoring
- Risk Appetite Thresholds
- Tolerance Monitoring
- Heat Map Visualisation

Treatment & Action

- Treatment Plans
- Action Accountability
- Escalation & Breach Alerts
- Residual Risk Tracking

Monitoring & Reporting

- KRI Monitoring
- Board Dashboards
- Management Reporting
- Trend Analysis

THE CHALLENGES IT FIXES

Risk registers nobody maintains

Annual reviews produce impressive registers that are outdated before they are presented. Residual risk is never re-assessed.

Risk appetite defined, but not enforced

The board sets appetite thresholds. Operational decisions ignore them. There is no mechanism to detect or escalate breaches.

KRIs reported in isolation

Key risk indicators tracked separately from the risks they monitor. Early warning signals go unnoticed until they become incidents.

Risk and assurance disconnected

The audit plan bears no relationship to the risk register. High-risk areas go unaudited. Low-risk areas receive excess coverage.

PART OF THE XGRC® PLATFORM

Enterprise Risk Management runs on one secure, auditable data foundation with risk, compliance and assurance, so it is governed as part of the whole, not in a silo.
