

ESG

ESG reporting that survives investor scrutiny.

Collect, manage, and report ESG data in a structured, auditable way — aligned to GRI, IFRS S1/S2, and CDP — so your sustainability disclosures are backed by evidence, not just intention.

WHAT ESG DELIVERS

Context & Strategy

- Materiality Assessment
- ESG Strategy
- Stakeholder Engagement
- Business Strategy Alignment

Environmental

- Scope 1, 2 & 3 Emissions
- Energy Monitoring
- Water & Waste Management
- Biodiversity Records

Social & Governance

- Employee Health & Safety Data
- Training & Development Records
- Board Composition & Diversity
- Anti-corruption Policies

Reporting & Assurance

- GRI Index Compilation
- IFRS S1/S2 Alignment
- IIRC Integrated Reporting
- CDP Disclosure Support

THE CHALLENGES IT FIXES

Disclosures built on unverifiable data

ESG reports assembled from manually collected spreadsheets. Investors and auditors increasingly ask for evidence. Evidence is not there.

Questionnaires that take weeks to complete

Investor ESG questionnaires arrive and the search begins. Data is scattered, definitions differ by site, nobody owns the numbers.

Targets without audit trails

Net-zero commitments and social targets made publicly. Progress tracked informally. Assurance providers have nothing to work with.

Regulatory disclosure obligations missed

IFRS S1 and S2 requirements are expanding. Organisations without structured ESG data collection cannot comply in time.

PART OF THE XGRC® PLATFORM

ESG runs on one secure, auditable data foundation with risk, compliance and assurance, so it is governed as part of the whole, not in a silo.
