

Libryo

Legal obligations, translated into action — for every site, every jurisdiction.

Libryo turns dense, constantly-changing EHS legislation into clear, site-specific compliance obligations. XGRC® partners with Libryo to embed jurisdiction-specific regulatory intelligence directly into your legal register, so obligations, tasks, and evidence live on the same platform as the rest of your governance and risk data.

WHAT LIBRYO DELIVERS

Libryo Sites

- Site-Specific Legal Registers
- Regulatory Change Monitoring
- Obligation Breakdown
- Multi-Jurisdiction Tracking

Libryo Assess

- Customisable Assessments
- Audit & Inspection Support
- Compliance Scoring

Action & Evidence

- Task & Workflow Management
- Evidence Management
- Audit Readiness Reporting

THE CHALLENGES IT FIXES

Legal registers built and maintained by hand

Legislation is tracked in spreadsheets by whoever has time. Updates depend on someone noticing a change in the Government Gazette.

Multi-site, multi-jurisdiction sprawl

Every site operates under a different mix of national, provincial, and local regulation. No single view of what applies where.

Regulatory changes discovered too late

A law changes; the business finds out at the next audit, or after an inspector does. There is no early-warning mechanism.

Obligations identified, but not actioned

Legal registers list what must be done. They rarely track who owns it, whether it was done, or what evidence proves it.

PART OF THE XGRC® PLATFORM

Libryo runs on one secure, auditable data foundation with risk, compliance and assurance, so it is governed as part of the whole, not in a silo.
