

MSX®

One management system. Multiple standards. Less duplicated effort.

MSX® merges your governance, risk, compliance, and operational systems into one common framework — eliminating conflicting responsibilities, removing duplicated effort, and giving leadership real-time visibility across all business activities.

WHAT MSX® DELIVERS

Leadership & Strategy

- Leadership
- Governance
- Strategy & Initiatives
- Objectives & Targets

Operations & Support

- Operations
- Support
- Change Management
- Communication

- Performance Evaluation
- Improvement
- Event Management
- Non-conformances

Compliance & Assurance

- Audit Management
- Legal Compliance
- Legal Appointments
- Risk Assessment

People & Documentation

- Training
- Stakeholder Engagement
- Document Manager
- Document Template Control

THE CHALLENGES IT FIXES

Multiple systems, multiple truths

ISO 9001, ISO 14001, and ISO 45001 managed in separate tools. The same data entered three times, never reconciled.

Improvement programmes disconnected from risk

Continual improvement initiatives tracked in isolation — no link to the risks they are supposed to address.

Board reporting takes weeks

Management performance data lives across departments, systems, and spreadsheets. Consolidation consumes more resource than the analysis.

Certification gaps only surface at audit time

Without continuous monitoring across all ISO requirements, gaps accumulate silently between certification cycles.

PART OF THE XGRC® PLATFORM

MSX® runs on one secure, auditable data foundation with risk, compliance and assurance, so it is governed as part of the whole, not in a silo.
